Sistrade® NEW FEATURES Release 8.0

Sistrade® Shipment

A new feature has been created so that after the registration of a transfer note between warehouses, the system can generate a corresponding transport note, for cases in which the location of the warehouses requires the issuance of the corresponding waybill.

Sistrade® Stocks Management

A new menu option, to allow making quantity correction in packages, arising from the reception of raw materials, initial stocks or entries of semi-manufactured/finished product. Thus, even if these packages have been moved, it is possible to correct the quantities of these movements, ensuring the absence of data inconsistency.

Sistrade® Production data collection

New feature for Maintenance of Repairs and Registration of Non-conformities in Production Data Collection environment
This optimisation aims to adapt the system to the plant production data collection scenarios, where the production process is based on serial number, because of the need to be able to indicate the serial numbers that need repair, through problems, causes and solutions.

KEEP UP WITH INTERNATIONAL ECOMMERCE PLATFORMS OF PRINTED PRODUCTS

Are you fed up with spending hours on making estimates? Are you receiving calls asking about the orders that never seem to end? Or losing work to online estimating companies? Sistrade® Web2Print solution is the right answer to your problems!

Sistrade® Web2Print is 100% web based software, which allows all the printing industry maintain a facilitated contact with customers 24 hours a day! This software offers the customer "immediate order". The customer can choose a product from a catalogue, project the product, select the specific facilities and delivery date, in just a few minutes.

Integrated with MIS|ERP Sistrade Software 100% Web

Sistrade® Web2Print is completely integrated with MIS|ERP Sistrade® which will allow access to all features through a web browser. Within minutes, the customer places the order online, proceeds to the payment and is invoiced automatically. In turn, after the payment, ERP will automatically generate a purchase order and create a corresponding work sheet to initiate the production process in the shortest possible time.
