Sistrade® NEW FEATURES Release 8.1

Sistrade® Basic & Materials Module

Since Sistrade is implemented in various companies that export standard products, it is necessary to provide a feature that allows setting the material description in various languages.

Sistrade® Scheduling Module

With the latest optimisation in scheduling, the system validates the delivery date of raw materials, creating blanks from 3 to 5 days in machines; this is because the following job orders are always scheduled after the last. In the current version, the system validates if there is an available space in the machine, where the user will perform the operation, and, if so, the system will allocate the operation to the machine in this space. If the space is not found, the system maintains the current behavior, i.e. allocates the operation in the machine after the last operation.

Sistrade® Production Management

In Job Order Management, with the new "Commercial Kit" feature in the articles, that is, an article just created for the assembly of "n" articles, it is now necessary to adapt the generation system of job orders of composite articles in perspective that when facing with an article of the "Commercial Kit" it is unfolded and manages the job orders.

SISTRADe PARTICIPATED IN ANOTHER EDITION OF LABELExPO EUROPE

For the fourth time, SISTRADe is an exhibitor at Labelexpo Europe, one of the most important fairs of the sector in the world. During the fair, SISTRADe seeks to strengthen its position in the international market as supplier of MIS|ERP 100% Web software for label and packaging printing industry, strengthening the relationship with the customers and encouraging new business opportunities.

SISTRADe PARTICIPATED IN GRAFIMA 2015 FAIR FOR THE THIRD TIME

For the past few years, after the opening of SISTRADe delegation in Ljubljana, and new clients in Serbia and Croatia, SISTRADe has been betting on Southeast Europe market with excellent results to date. The participation in the following edition of Grafima 2015 is crucial to solidify its presence in Southeast Europe market as a supplier of ERP software for the printing and packaging industry as well as to strengthen the relationship with the customers and encourage new business opportunities.

SISTRADe participated in the 31° Plastic Conference organized by APIP

EURASIA PACKAGING ISTANBUL

It is already for the 7th time that SISTRADe participates in the 21st edition of EURASIA PACKAGING, making it a strategic reference for the company's growth on the Turkish market of rigid packaging printing.
