

INNOVATION

SISTRADe LAUNCH NEW VERSION V.12

The new version V.12 of Sistrade® Software has been launched and now is available on the market. This new customized software solution will simplify, accelerate and improve all the processes of the company.

As usually, this Sistrade® version brings new features and many improvements, enabling the companies to be a part of the Industry 4.0 transformation, contributing to an improvement of automation and the increase of the production efficiency, and quality along with the entire business operations.

Scheduling features with more styles, usability and technologies used

In Orders rows the user can select all the necessary references

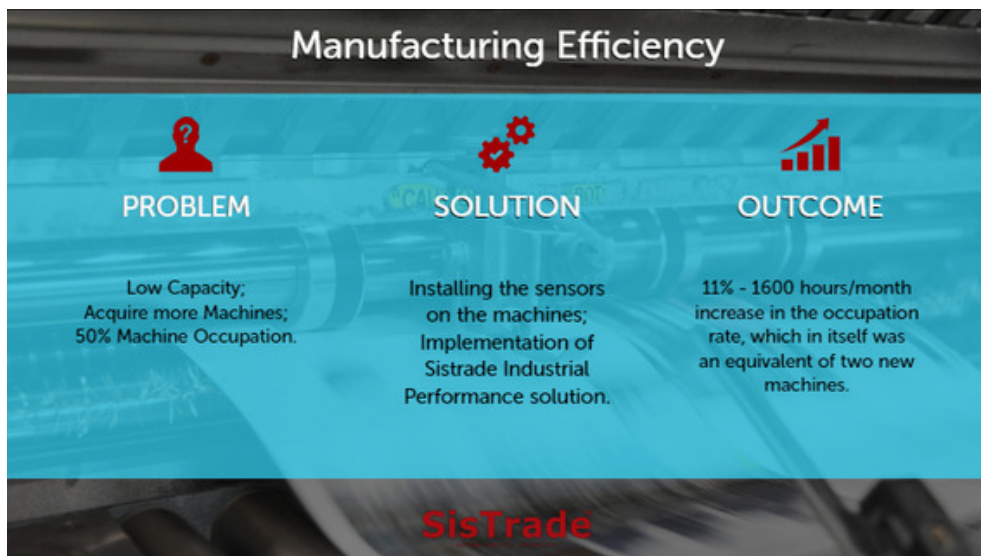

At the beginning of the year, SISTRADE hosted the 1st TradeTALK, an open innovation initiative organized by SISTRADE. One hour of brainstorming on technology, business, and other topics of general interest.

MANUFACTURING EFFICIENCY GOING DOWN IN YOUR COMPANY?

by Sistrade

Investment in new equipment can help the company to increase the industrial efficiency, however, it is not the only solution, sometimes increasing the capacity of already existing equipment does just the same.

Exemplifying it with a practical case, one of our clients, a label converting company, has reached out to SISTRADE team, presenting the problem that they had in their production hall at the time.

SUCCESSFUL INVESTMENT STRATEGY ON THE THAI MARKET

*by Sistrade – Portugalglobal
Magazine (AICEP)*

SISTRADE entered the Thai market in 2011 thanks to its first customer in the printing industry in the area of flexible packaging printing. Since then, SISTRADE strategy for the Thai market has been supported by a local partner that allowed business growth by attracting more customers. At the moment, the company has three customers in Thailand in the field of carton and flexible packaging.

development” that
Thailand's economy
has registered
motivated
SISTRADE interest
in the market.*

In 2015, SISTRADE entered into a partnership agreement with BJC (Berli Jucker Public Company Limited), which allowed a presence on the Thai market. SISTRADE has received direct support from its local partner in the prospecting and conclusion of the business, developing from the start, the measures for promotion of Sistrade solution in the printing market in Thailand.
