Web2Print

USER FRIENDLY INTERFACE

- Printing online has never been so simple, with a fast and responsive platform web-to-print, customers, regardless of location and with any device can order a product and pay in no time.

EASY TO CONFIGURE & MANAGE

- Sistrade® Web2Print does not require IT skills. Administrators can easily configure and manage web-to-print platform through a module, integrated with MIS|ERP Sistrade®, which allows them to modify the design and catalogue, manage orders, download files uploaded by users, as well as provides them with the statistical data such as the information about products that were most visited, and many others features.

ONLINE PRODUCT DESIGNER

- For customers, we developed a user-friendly online product designer, using HTML5 it can run on any device. This gives the printing house and customer guarantee that final product has the high-quality output and measures.

SECURE ONLINE PAYMENTS

- We provide a high-security payment gateway, all data are encrypted and we guarantee the safety of your money. What is more, there are many possibilities of payment integration that can be configured.

UPLOADED CUSTOMER FILES

- Customers have the possibility to upload files in various formats (pdf, png, jpg, bmp). These files can be found in Orders manager associated to the customer order.
